

# The 5 W's of Aquarius Samples!

Grant Gilron | EDUCATION SPECIALIST

# AGENDA

---

- **W**hat is Aquarius Samples?
- **W**hy should you use it?
- **W**ho should use it?
- **W**here can you use it?
- **W**hen can you use it?
- Question & Answers

# USER POLL!

---

**What is your level of  
experience with Aquarius  
Samples?**  
*(between 0 and 10)*

# What is Aquarius Samples?

---

**AQUARIUS Samples** is a **Software-as-a-Service (SaaS)** application that streamlines the production and management of **environmental lab** and **field sample data**, saving time while increasing the quality of final data.

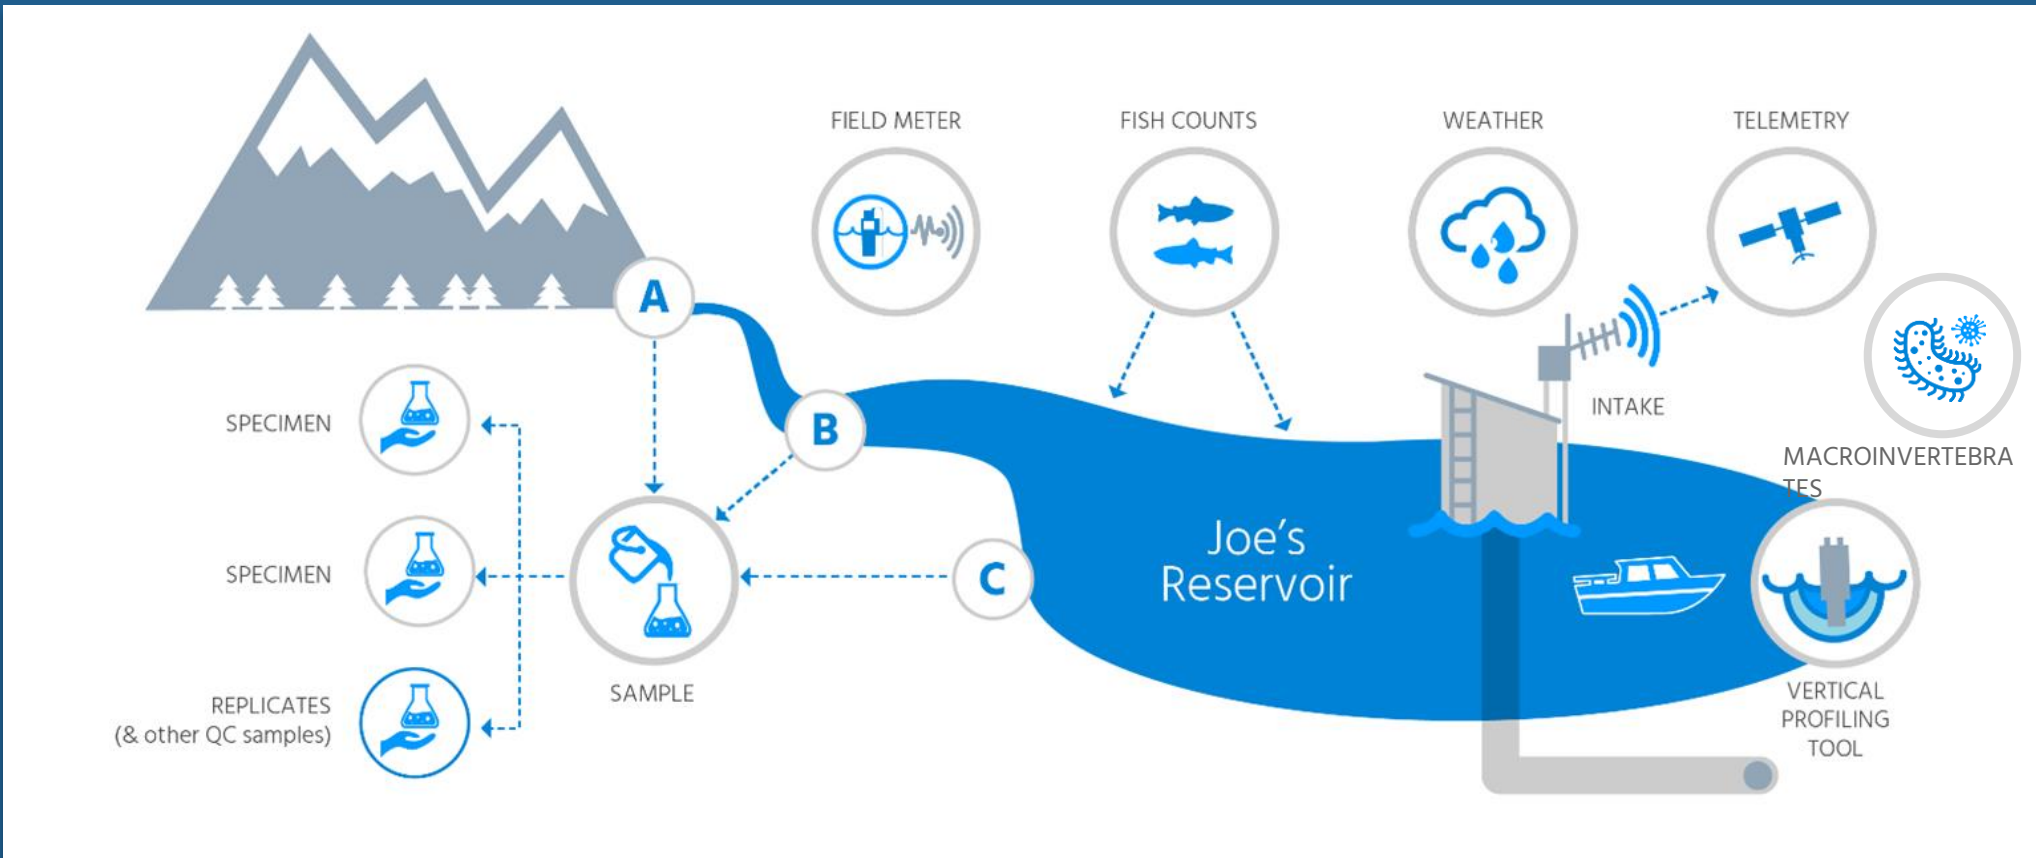

All **discrete water, air, soil, biological, and tissue data** are **securely stored and validated online** for **rapid analysis and visualization** – to support better decisions anytime, anywhere.

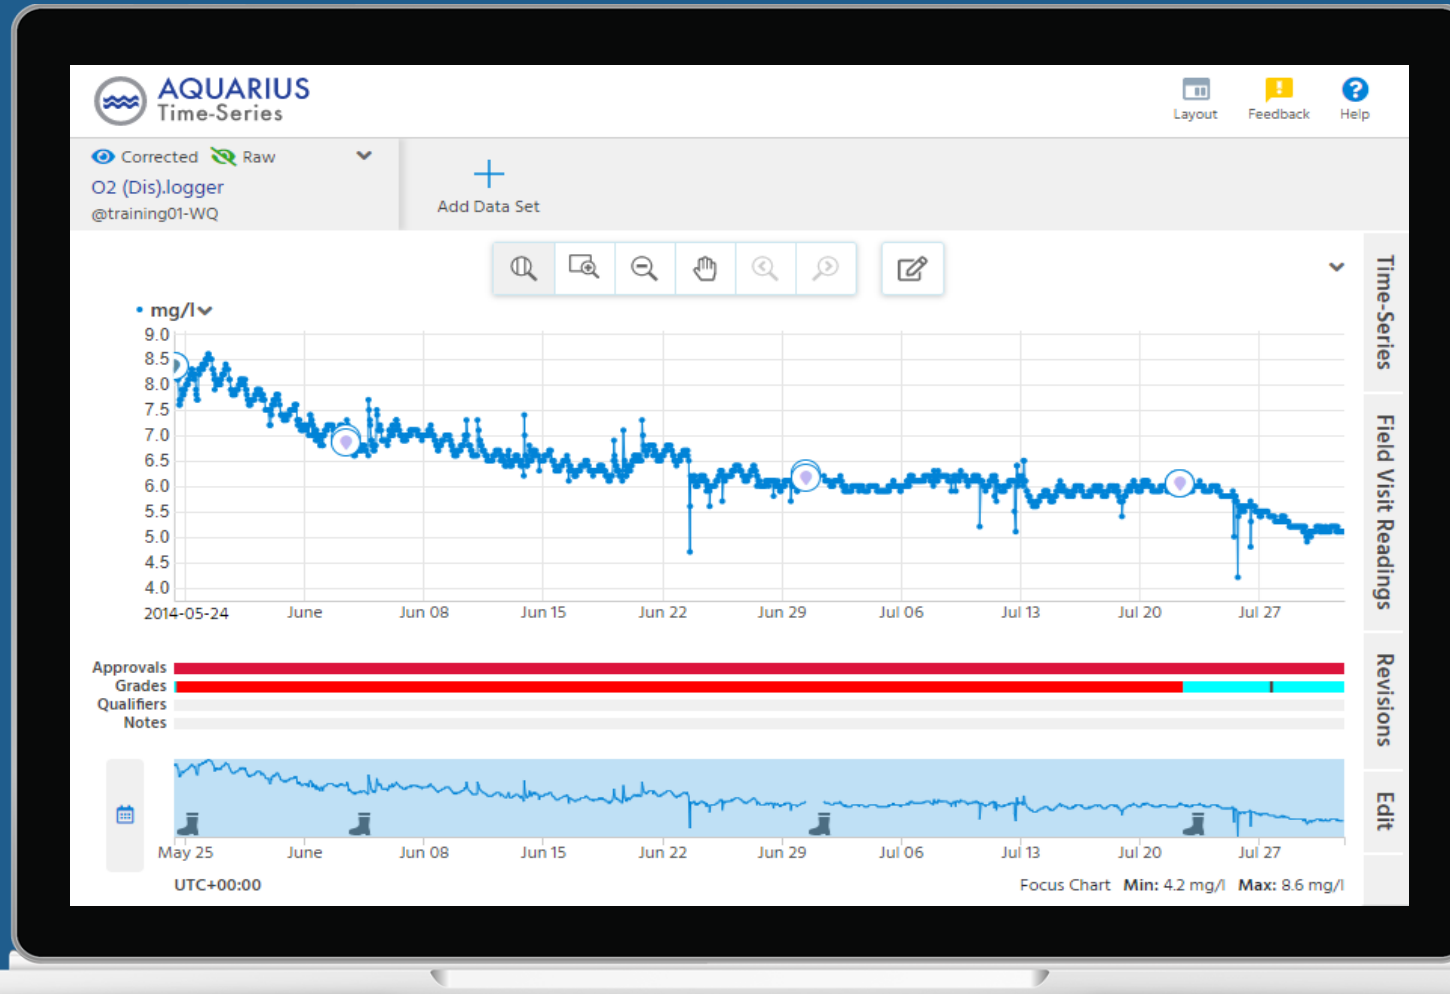

# What is Aquarius Samples?

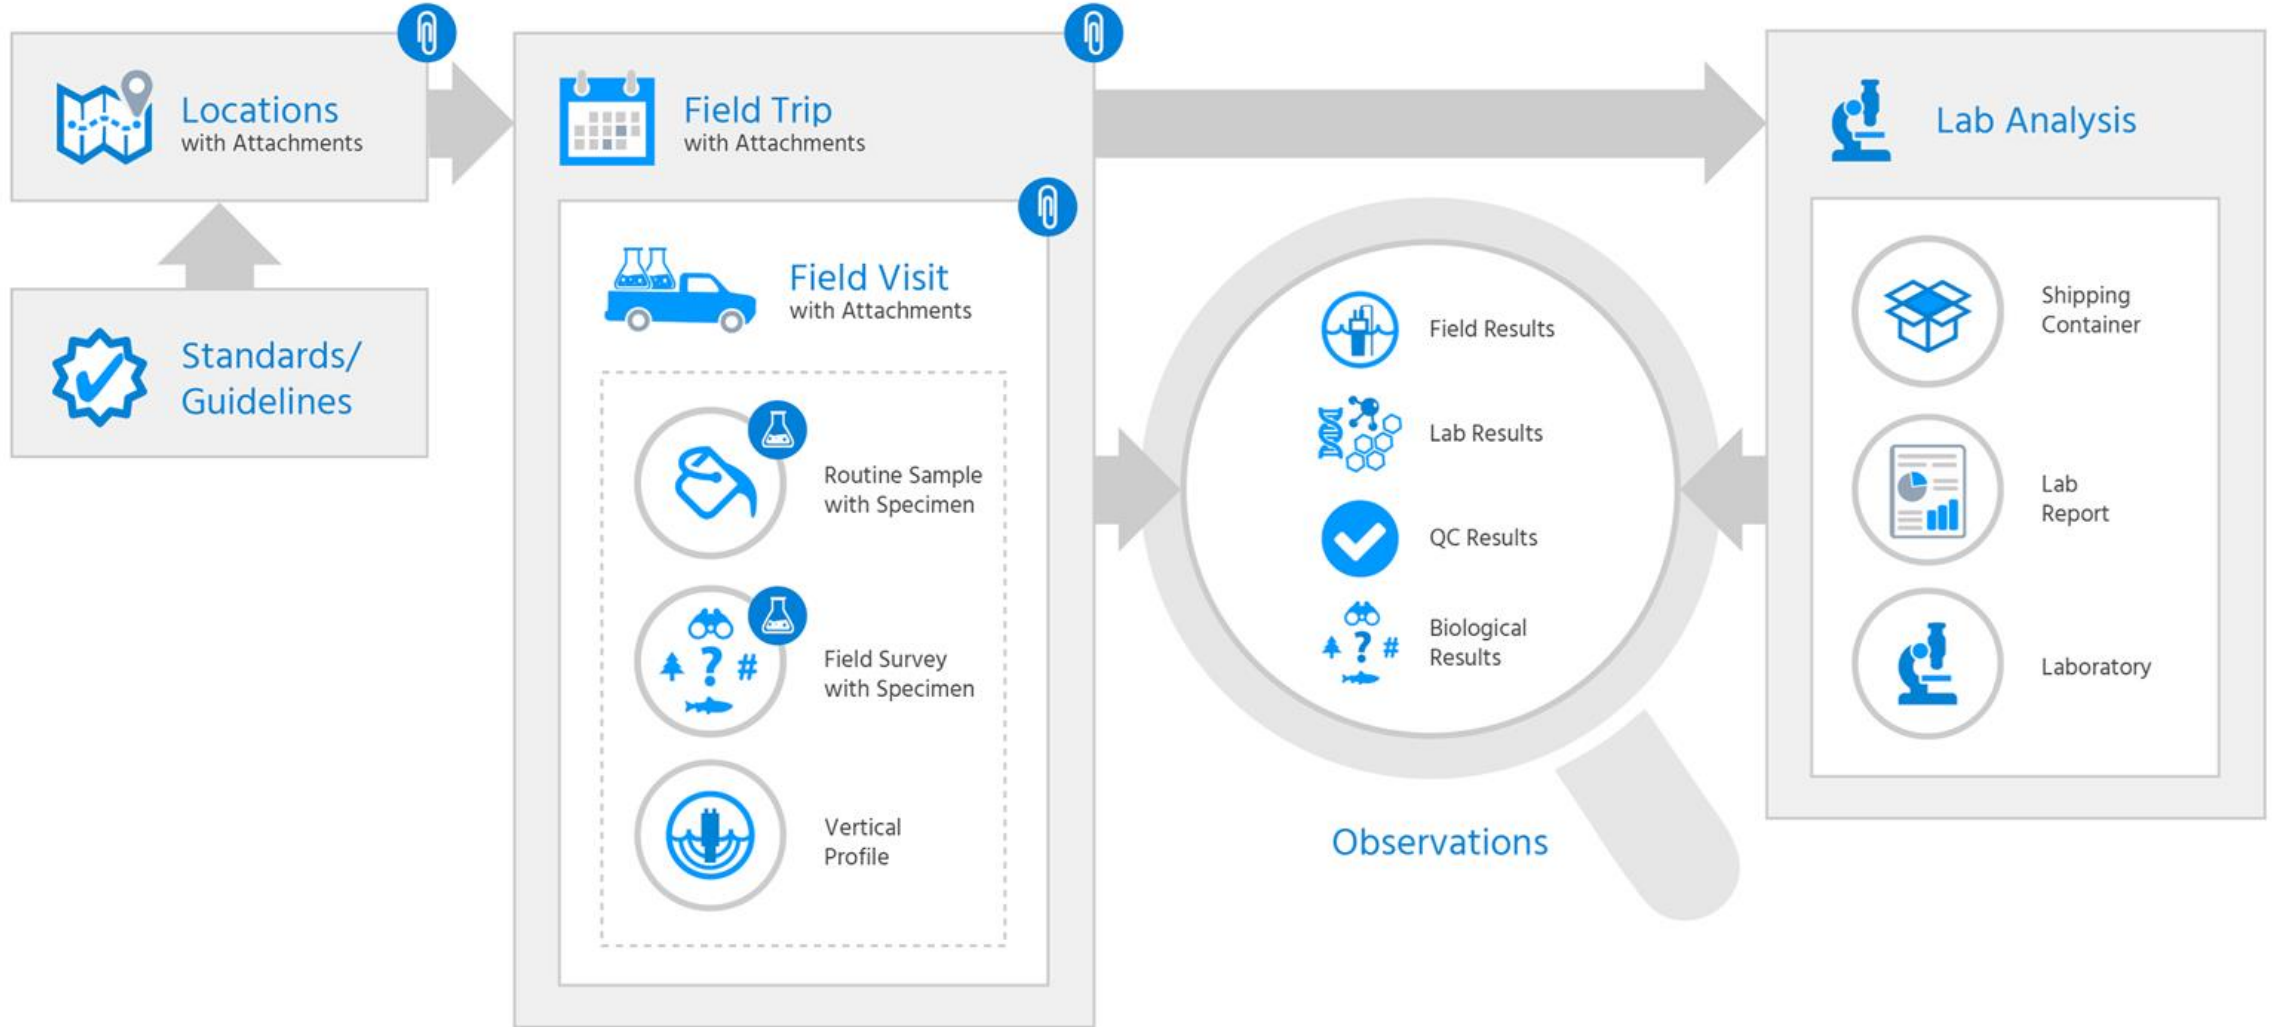

## A Single Source of Truth...

# Integration with AQUARIUS Time-Series!

# Aquarius Samples Terminology

# Why use **Aquarius Samples**?

---

## **Discrete sampling data is unique and very diverse...**

- Many types of metadata, methods, processes
- Different data lives in different places (water quality, sediment, ecological data...)

## **Challenges from decentralized, hard-to-access data...**

- Where are all the data?
- Are they up to date?
- Which version?
- How to interpret/use it?
- Is it trustworthy – how was it collected/analyzed?
- How to easily access it pull it all together/compare spatially and over time?

# Why use **Aquarius Samples**?

---

## **Provides Search and Discovery**

- Powerful and robust search filters and full text search tools

## **Challenges from decentralized, hard-to-access data...**

- Where are all the data?
- Are they up to date?
- Which version?
- How to interpret/use it?
- Is it trustworthy – how was it collected/analyzed?
- How to easily access it pull it all together/compare spatially and over time?

# Why use **Aquarius Samples**?

---

## **Centralizes these data, and make it accessible for analysis**

- A basic map, powerful filter criteria, multi dataset and box plot charts, export

## **Provides data validation, exceedances & review**

- Define location and time-based standards, validate datasets against them and see violations

## **Enables focused import with preview**

- Powerful, intuitive file import allowing data owners to directly import data without programming, leverage metadata validation, and a preview (before committing)

# Who should use **Aquarius Samples**?

---

- YOU!
- **Scientists or Technicians** monitoring discrete **water, air, soil, biological, and tissue data**
- Laboratory technicians (water testing)

# Who should use **Aquarius Samples**?

---

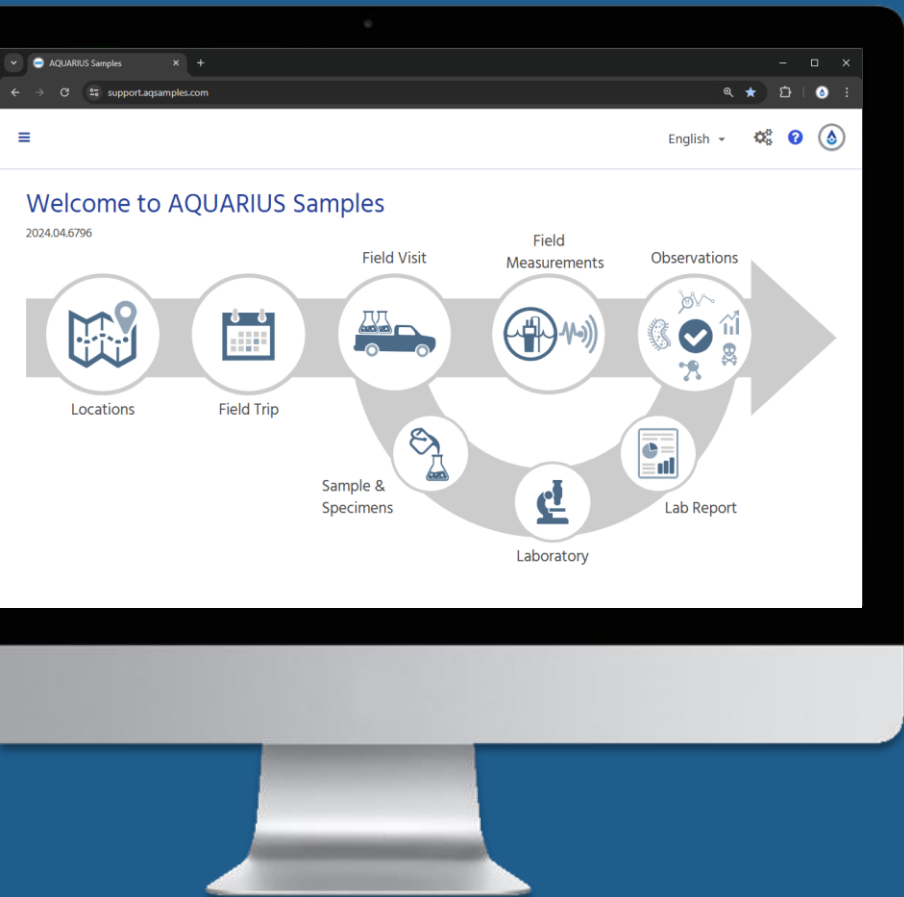

- **Users can be distinguished by...**
  - **'Admin'** vs. **non-admin** users  
(only administrators can change system settings)
  - Area/data type (e.g., Field Tech Area A vs. Field Tech Area B)
  - Role/Function (e.g., Lab data access vs. field data access)
- **Provides an **audit trail** tracking **who** did what, and when**

# Where can you use **Aquarius Samples**?

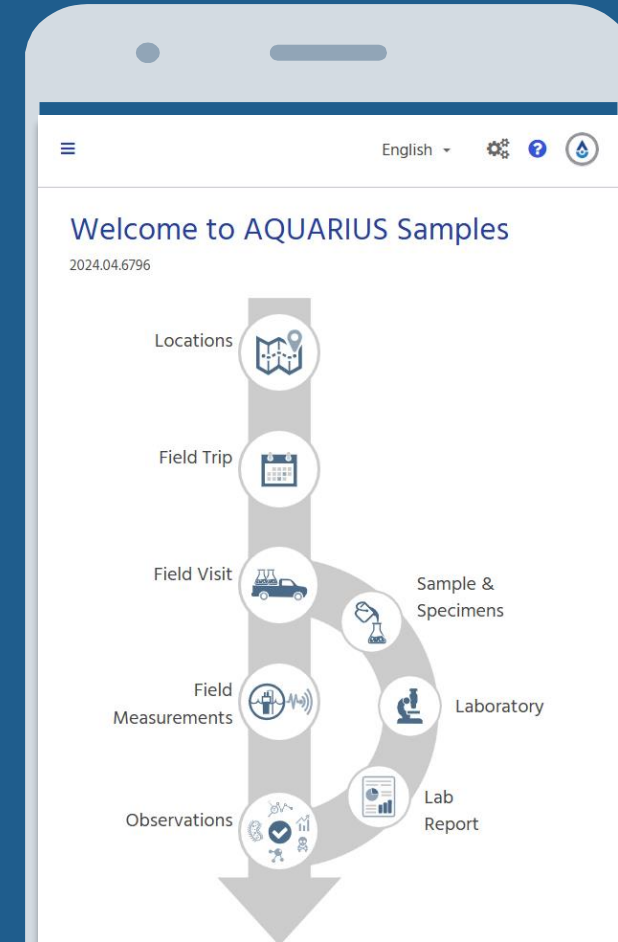

## In the office...

## Visual Workflow...

- Key workflow steps accessible by clicking on the workflow icons
- Each icon corresponds to a menu item on the left side of the screen
- Adapts for cell phones and tablets

## In the field...

# Where can you use **Aquarius Samples**?

## Enable the **'Sampling plan → Lab Results'** workflow

- Quickly set up a comprehensive sampling plan (field and lab data)
- Take the plan 'into the field' to enter data, and use it as a 'to do list'
- After completing field work, easily track progress against the plan
- Initiate the 'Chain of Custody' process:
  - Let the lab know 'what's coming' ( i.e., a 'Work order')
  - Track who is in possession of the physical bottles (i.e., a 'Custody log')

# Where can you use **Aquarius Samples**?

## Enable the 'Sampling plan → Lab Results' workflow (continued)...

- Import lab reports into AQS automatically
- Easily see which new lab data is available
- Quick validation, visualization and analysis of new results
- Easy export including exceedances via 'crosstab' reports

Ok, ok, can we see it please?

---
